

Subaru Ascent 2019-2022

Start by cleaning the area where the bracket will be installed. With rear door shut, hook and stick top bracket over the hinge bump like shown in **photo 1** (be sure its seated all the way back as to prevent any rubbing in hinge gap). A few test runs before sticking it down is a great idea.

Place the ladder onto the upper bracket & into the slots that are on the under side of ladder. It should slip into place and lock in as shown in **photo 2**. Be sure ladder is all the way back to have the proper fit.

With rear door just slightly open, align bottom of ladder to the bottom of rear door. Then, attach bottom bracket, with provided screws, to base of ladder and over the lip of the door as shown in **photo 3**.
